### New general subjects - Human Rights and Municipal Law

New general subjects added to our case law will allow you to complete your work more efficiently. Researchers who are looking for cases on Human Rights or Municipal Law can now access search templates that narrow the scope of your search to cases on those topics. Additionally, post-search subject area filters allow you to start with a broad search and then isolate cases on those topics. This allows you to quickly and easily narrow down to search results to only those cases that you need.
