RESEARCH TIPS

Search for terms as defined in judicial interpretations and Canadian legislation simultaneously

Did you know the Defined Terms (Cases and Legislation) finding tool allows users to search for terms as defined in judicial interpretations and Canadian legislation simultaneously? This tool is found under the Finding Tools section of the WestlawNext Canada home page. Simply enter a term in the Defined Terms template (available from the WestlawNext Canada homepage) and search results will include cases and decisions, statutes, regulations, rules and Words & Phrases entries containing the term. A Words & Phrases search will provide researchers with solely judicial interpretations.
