Advantage Over Other Research Services

	WestlawNext [®] CANADA	Other Services	
Ease of Use	Customizable Display	Clear, intuitive interface leveraging the best of modern web design and lets you customize your interface with most frequently used content on home page for easy access.	Other services have interfaces that are outdated and out of step with expectations of new users. Nothing compares to the customization on WestlawNext Canada.
	Visual Indicators	Visual indicators help you keep track of work you have already done.	No other service has anything comparable to WestlawNext Canada's visual indicators.
Comprehensive Legal Content	Primary Law, Analytical, Materials, Legislation Materials	Unparalleled breadth and depth of primary law, analytical materials, and finding tools. Our content contains Carswell and Canada Law Book collections, including authoritative case reports, key tribunal materials and market-leading treatises and annotations.	No other service can match our scope and historical depth of coverage.
Canada's Most Advanced Legal Search Engine	Search	Single search box on home page lets you choose how you want to search: plain language, Boolean, find particular document, note up a particular document, and simultaneously search across all content types.	Other services are limited to searching by database or content type, and you are required to choose separate boxes for Boolean terms, plain language, or to find a particular document.
	Sort and Filter Results	Lets you search broadly across all content and then sort by content type such as cases, statutes, and more. You can also narrow your list results by any applicable field: jurisdiction, topic, judge, law firm, and more.	No other service has this level of filtering capability.
	Plain Language Search	Market-leading plain language search engine, with results ranked by relevancy, has been newly enriched to help even novice users find what they need.	Other services do not offer plain language searching capability or the option is limited.
Finding Tools	Unique Editorial Tools	Primary law documents integrate with related information via editorially created links, ensuring that you find what you need quickly, without missing anything: These links are powered by our market-leading finding tools: <ul style="list-style-type: none"> • Canadian Encyclopedic Digest • Canadian Abridgment classification and case digests • KeyCite Canada (case, statute, regulation and rule citator) • Words and Phrases • Index to Canadian Legal Literature 	Other services have tried to create equivalent services, but are lacking in terms of historical depth, scope of content, and integration with other content. As a result, these services have far fewer links on primary law documents to related information, making for inefficient research.
Analyze and Organize More Efficiently	Project Folders	Allow you to drag-and-drop key documents and text snippets into folders organized by issue, client, or topic, which puts all vital information in one place for quicker access later.	No other service offers integrated foldering for their legal research.
	Notes and Highlighting	You can highlight text within a document. You can also type in your own personal research notes on a particular case for future reference, make a note to yourself to follow up on something, and overall, keep your thought process going and productively captured.	No other service offers the ability to highlight text or create research notes.
	Copy with Citation	You can copy and paste text into your work product with all available citations.	No other service offers this.
